

**AWZ540****V2.0****MZN1****Over voltage protection module**Edition: 4 from 20.02.2014  
Supersedes: 3 from 28.06.2012**EN\*****1. Description.**

The over voltage protection module is intended for protecting systems powered with 12V DC against being supplied with too high supply power (e.g. as a result of damaged stabilising system of a PSU). When the maximum accessible input voltage is detected, the output is cut off protecting the receivers from damaging. Activation of the system is indicated by the red LED – L1.

**2. Module description.****2.1. Description of components and connectors of the module.**

Element no. [fig. 1]	Description
[1]	L1 red LED (indicates activation of the system that cuts off the output voltage)
[2]	Screw connector – module's output
[3]	Screw connector – module's power input
[4]	Mounting panel

**3. Specifications.**

Supply voltage	9 V ÷ 40 V DC
Output voltage	9 V ÷ 14,1 V DC (+/-0,4V)
Output disconnection voltage	14,1V (+/-0,4V)
Switching hysteresis	+/-0,1V
Load current	4A max
Voltage drop	$\Delta U = 0,2V$ max @ 4A
Approximate time of voltage disconnection	100us @ I=1,7A
Approximate time of voltage connection	250us @ I=1,7A
LED indication	Red LED - L1- (indicates activation of the system that cuts off the output voltage)
Operating conditions	II environmental class, -10°C ÷ 50°C
Dimensions	50 x 26 x 43 (WxHxD)
Installation	installation tape or installation bolt x2
Connectors	Screw connectors $\Phi 0,41 \div 1,63$ (AWG 26-14)
Net/gross weight	0,02kg / 0,04kg
Declarations, warranty	CE, RoHS, 2 year from the production date

Fig.2. Electrical scheme and voltage waveforms.

**WEEE PARKING**

According to the EU WEE Directive – It is required not to dispose of electric or electronic waste as unsorted municipal waste and to collect such WEEE separately.

**WARRANTY**

Pulsar K. Bogusz Sp.j. (the manufacturer) grants a two-year warranty for the equipment, counted from the device's production date.
