

HDCVI Eyeball Camera

User's Manual

V1.0.0

General

This user's manual (hereinafter referred to be "the Manual") introduces the functions, installation and operations of the camera.

Safety Instructions

The following categorized signal words with defined meaning might appear in the Manual.

| Signal Words | Meaning |
|--|---|
|  WARNING | Indicates a medium or low potential hazard which, if not avoided, could result in slight or moderate injury. |
|  CAUTION | Indicates a potential risk which, if not avoided, could result in property damage, data loss, lower performance, or unpredictable result. |
|  TIPS | Provides methods to help you solve a problem or save you time. |
|  NOTE | Provides additional information as the emphasis and supplement to the text. |

Revision History

| Version | Revision Content | Release Date |
|---------|------------------|--------------|
| V1.0.0 | First release. | May 2019 |

Privacy Protection Notice

As the device user or data controller, you might collect personal data of others such as face, fingerprints, car plate number, Email address, phone number, GPS and so on. You need to be in compliance with the local privacy protection laws and regulations to protect the legitimate rights and interests of other people by implementing measures include but not limited to: providing clear and visible identification to inform data subject the existence of surveillance area and providing related contact.

About the Manual

- The Manual is for reference only. If there is inconsistency between the manual and the actual product, the actual product shall prevail.
- We are not liable for any loss caused by the operations that do not comply with the manual.
- The manual would be updated according to the latest laws and regulations of related

regions. For detailed information, see the paper manual, CD-ROM, QR code or our official website. If there is inconsistency between paper manual and the electronic version, the electronic version shall prevail.

- All the designs and software are subject to change without prior written notice. The product updates might cause some differences between the actual product and the manual. Please contact the customer service for the latest program and supplementary documentation.
- There still might be deviation in technical data, functions and operations description, or errors in print. If there is any doubt or dispute, please refer to our final explanation.
- Upgrade the reader software or try other mainstream reader software if the manual (in PDF format) cannot be opened.
- All trademarks, registered trademarks and the company names in the manual are the properties of their respective owners.
- Please visit our website, contact the supplier or customer service if there is any problem occurred when using the device.
- If there is any uncertainty or controversy, please refer to our final explanation.

Important Safeguards and Warnings

CAUTION

Electrical Safety

- All installation and operation should conform to your local electrical safety codes.
- The power source shall conform to the requirement of the Safety Extra Low Voltage (SELV) standard, and supply power with rated voltage which conforms to Limited power Source requirement according to IEC60950-1. Please note that the power supply requirement is subject to the device label.
- A readily accessible disconnect device shall be incorporated in the building installation wiring.
- Make sure if the camera power adapter meets the camera operating voltage requirement before powering up the device (The material and length of the power cable might influence the device voltage).
- Prevent the power cable from being trampled or pressed, especially the plug, power socket and the junction extruded from the device.
- We assume no liability or responsibility for all the fires or electrical shock caused by improper handling or installation.

Environment

- Do not aim the device at strong light to focus, such as lamp light and sun light.
- Transport, use and store the device within the range of allowed humidity and temperature.
- Keep the camera away from water or other liquid to avoid damages to the internal components.
- Keep sound ventilation to avoid heat accumulation.
- Heavy stress, violent vibration or water splash are not allowed during transportation, storage and installation.
- Pack the device with standard factory packaging or the equivalent material when transporting the device.
- It is recommended to use the device together with lightning arrester to improve lightning protection effect.
- It is recommended to get the grounding holes to be grounded to enhance the reliability of the device.
- It is recommended to use qualified video transmission cable to improve video quality. It is recommended to use RG59 coaxial cable or higher standard.

WARNING

- Use standard components or accessories provided by manufacturer and make sure the device is installed and maintained by professional engineers.
- The surface of the image sensor should not be exposed to laser beam radiation in an environment where a laser beam device is used.
- Do not provide two or more power supply sources for the device; otherwise it might damage the device.
- When the camera is in the condition of PoC power supply, do not connect any other devices between the camera and PoC XVR or PoC transceiver including UTC, Balun, optical transceiver, distributor and convertor and so on; otherwise, the device might get burned.
- PoC power supply is with high voltage. Do not dismantle the device during normal operation; otherwise it might cause danger to both device and users due to high voltage.

| 4.3 Operating OSD Menu | 11 |
| 5 Maintenance..... | 13 |

1.1 General

This series of products comply with the HDCVI standard and support the transmission of video and control signal over coaxial cable. They produce video signal with megapixel resolution and require XVR device that comply with the HDCVI standard to achieve high speed, long distance and zero lag transmission of the signal. They are applicable to cover the high definition monitoring needs for locations like financial center, telecom site, supermarket, hotel, government, school and factory.

1.2 Features

- 720p series support over 800 m real-time transmission of video and control signal from RG59 cable; for 1080p to 4k series, the distance is 500 m.

For PoC cameras, 1080P series support 400 m power supply transmission, and 4MP series support 300 m by RG59 cable.

- Excellent low-light performance with IR or night vision technology.
- Configure devices easily with OSD menu.
- Support switching between HD/SD outputs.
- IP67 rated.

2.1 Dimension

Figure 2-1 Model A (mm [inch])

Figure 2-2 Model B (mm [inch])

Figure 2-3 Model C (mm [inch])

Figure 2-4 Model D (mm [inch])

Figure 2-5 Model E (mm [inch])

2.2 Cable

Cable type might vary with different cameras, and the actual product shall prevail.

Figure 2-6 Cable port list

For more information about cable ports, see Table 2-1; for the operation method of ⑥(DIP switch), see Table 2-2.

Table 2-1 Cable port description

| No. | Port Name | Function |
|-----|-----------|----------|
|-----|-----------|----------|

| No. | Port Name | Function |
|-----|------------------------------|---|
| ① | 12V DC power input | <p>Inputs 12V DC power. Please be sure to supply power as instructed in the Manual.</p>  <p>Device abnormality or damage could occur if power is not supplied correctly.</p> |
| ② | 12V DC or 24V AC power input | <p>Inputs 12V DC or 24V AC power. Please be sure to supply power as instructed in the Manual.</p>  <p>Device abnormality or damage could occur if power is not supplied correctly.</p> |
| ③ | Video output | <p>Connects to XVR to output video signal.</p>  <p>For PoC cameras, it connects to XVR to output video signal and at the same time supplies power to the camera. And this function is available only in the HDCVI video output mode.</p>  <ul style="list-style-type: none"> When the camera is in the condition of PoC power supply, do not connect any other device between the camera and PoC XVR or PoC transceiver including UTC, Balun, optical transceiver, distributor and convertor and so on; otherwise, the device might get burned. PoC power supply is with high voltage. Do not dismantle the device during normal operation; otherwise it might cause danger to both device and users due to high voltage. |
| ④ | Audio input | Connects to sound-pick-up devices to receive analog audio signal. |
| ⑤ | Power output | <p>Supplies 12V DC power.</p>  <ul style="list-style-type: none"> Ensure that power consumption of devices connected to this port is below 2W. Ensure that supply frequency of devices connected to this port is higher than 1MHz, such as sound pick-up, temperature/humidity sensor and other devices without power consumption change. It might cause image flickering if this port is connected to devices with supply frequency less than 1MHz, such as fan, Hall sensor, loudspeaker, motor and other electromechanical devices with power consumption change. |
| ⑥ | DIP switch | Dial switches to change output mode. Switch up indicates "ON", and switch down indicates "OFF." |

Table 2-2 Operation of DIP switch

| Switch1 | Switch2 | Output Mode |
|---------|---------|-------------|
| OFF | OFF | CVI |
| ON | ON | CVBS |
| ON | OFF | AHD |
| OFF | ON | TVI |

3 Installation

- Make sure the mounting surface is strong enough to hold at least three times of the camera weight.
- The following figure is for reference only, and the actual product shall prevail.

For the installation diagram and item list of model A and E, see Figure 3-1 and Table 3-1. For those of model B and model C, see Figure 3-2 and Table 3-2. For those of model D, see Figure 3-3 and Table 3-3.

Figure 3-1 Model A and E installation

Table 3-1 Installation item list

| No. | Item | No. | Item | No. | Item | No. | Item |
|-----|------------------|-----|----------------|-----|-------------|-----|--------------------|
| ① | Mounting surface | ② | Expansion bolt | ③ | Pedestal | ④ | Self-tapping screw |
| ⑤ | Device | ⑥ | Enclosure | ⑦ | Fixing ring | — | — |

Figure 3-2 Model B and C installation

Table 3-2 Installation item list

| No. | Item | No. | Item | No. | Item | No. | Item |
|-----|------------------|-----|----------------|-----|----------|-----|--------------------|
| ① | Mounting surface | ② | Expansion bolt | ③ | Pedestal | ④ | Self-tapping screw |
| ⑤ | Device | ⑥ | Enclosure | ⑧ | Wrench | ⑨ | Locking screw |

Figure 3-3 Model D installation

Table 3-3 Installation item list

| No. | Item | No. | Item | No. | Item | No. | Item |
|-----|------------------|-----|----------------|-----|----------------|-----|--------------------|
| ① | Mounting surface | ② | Expansion bolt | ③ | Pedestal | ④ | Self-tapping screw |
| ⑤ | Device | ⑥ | Enclosure | ⑩ | Locking button | — | — |

Step 1 Find the mounting template sticker from the accessory pack and stick it to the mounting surface①.

Step 2 Drill screw holes (and the cable outlet hole if it needs to go through the mounting surface) on the mounting surface as indicated on the mounting template, then insert expansion bolts② from the accessory pack in the screw holes.

Step 3 The disassembly way of camera is divided into three types:

- For model A and E, hold the pedestal③ tightly and keep the device⑤ upward, rotate the fixing ring⑦ counterclockwise until you can detach it from above, and then take off the pedestal③.
- For model B and model C, loosen the locking screw⑨ with the supplied wrench⑧ and take off the pedestal③.
- For mode D, press the Locking to take off the pedestal③.

Step 4 Adjust the location of the pedestal③ according to cable outlet requirement (top out or side out), then pull the cable out through mounting surface or the side cable tray. Align the screw holes on the pedestal③ to those on the mounting surface, then put in and fasten the supplied self-tapping screws④ to attach the device⑤ to the mounting surface.

Step 5 Connect the camera to power source, and then connect the device to the XVR device.

For PoC cameras: Connect the XVR device to power source, and then connect video output port of the camera to the PoC XVR device or PoC transceiver.

Step 6 The assembly and adjustment way of camera is divided into three types:

- For model A and E, put the fixing ring⑦ back to hold the enclosure⑥, leave some spaces enough for you to adjust the device⑤. Aim the lens to the ideal angle (see Figure 3-4) and fasten the fixing ring⑦.

Figure 3-4 Assembly and adjustment of model A and E

- For model B and model C, put the enclosure⑥ back on and adjust the locking screw⑨ to hold it, leave some spaces enough for you to adjust the device⑤. Aim the lens to the ideal angle and adjust the focus until you get clear image (see Figure 3-5) and fasten the locking screw⑨.

In Figure 3-5, ① is the locking screw.

Figure 3-5 Assembly and adjustment of model B and C

- For model D, Put the enclosure⑥ (with the device⑤ inside) back into the pedestal③. Rotate the enclosure⑥ and then rotate the device⑤ to get the lens an ideal angle. Adjust the focus until you get clear image. See Figure 3-6.

Figure 3-6 Assembly and adjustment of model D

- For model B and model C, it is easier to fit the enclosure⑥ to the pedestal③ if you put the higher end in first and then the lower end.
- For the models with vari-focal lens, you can adjust the zoom and focus through XVR device.

4 General Configuration

Power up the camera and connect it to XVR device with coaxial cable, and then the live view screen is displayed. The following instructions will guide you to configure your camera.

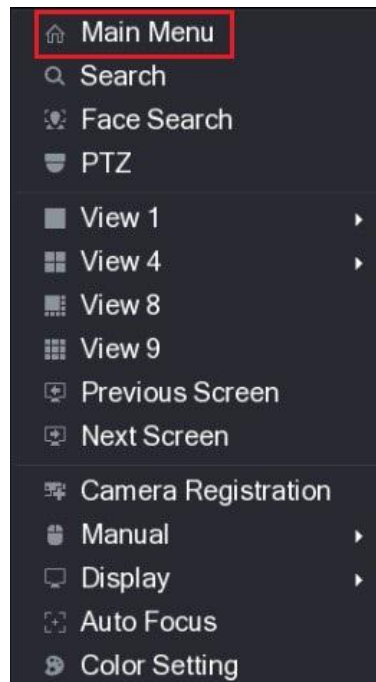

- The number of the coaxial port on XVR will display at the lower left corner of each window to indicate the corresponding camera.
- Interfaces of different XVR might vary, and the actual product shall prevail.

4.1 Opening Main Menu

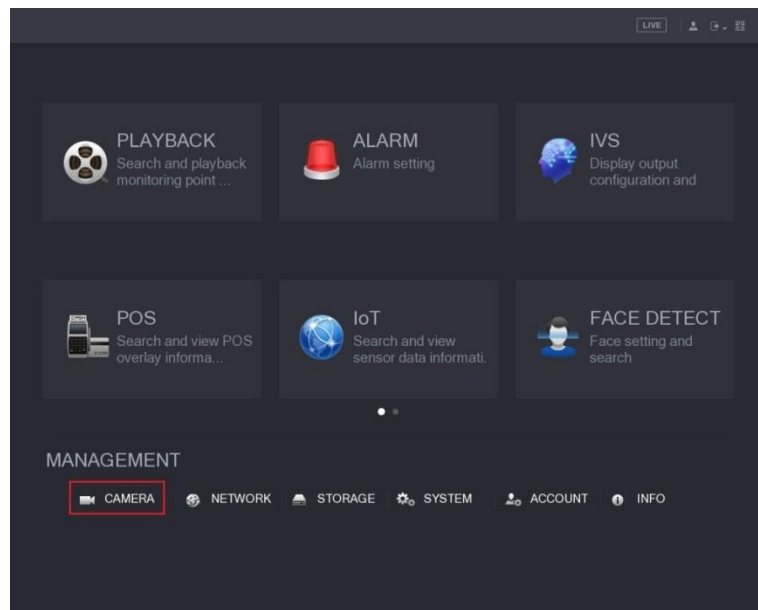

Step 1 In the live view screen interface, right-click anywhere on the screen.
The shortcut menu is displayed. See Figure 4-1.

Figure 4-1 Shortcut menu

Step 2 Click **Main Menu**.
The **Main Menu** interface is displayed. See Figure 4-2.

Figure 4-2 Main menu

Right-click anywhere on the screen to return to the previous interface until it goes back to live view screen.

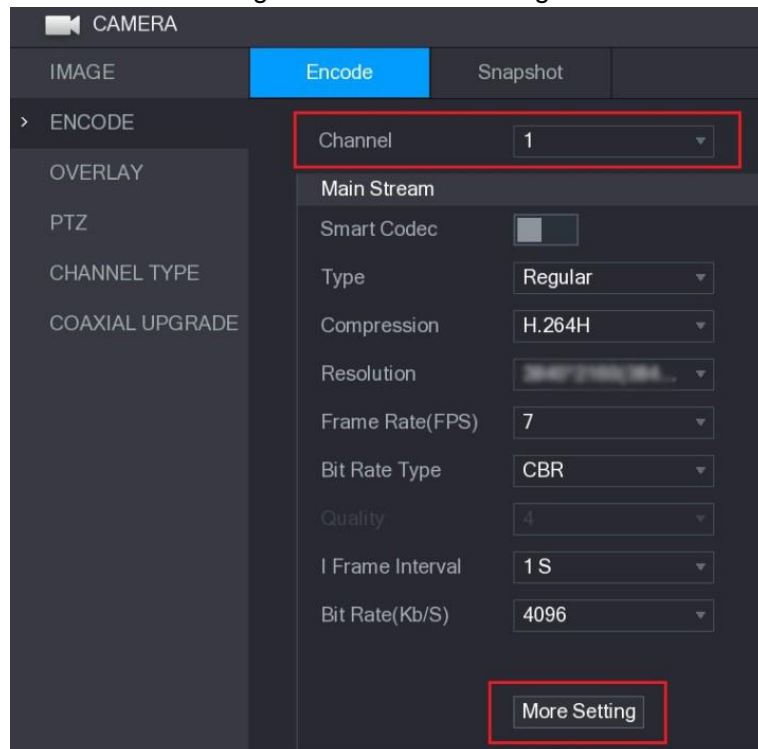

4.2 Setting Audio Input

Audio signal acquisition is available on select models.

Step 1 In the **Main Menu** interface (Figure 4-2), select **CAMERA > ENCODE > Encode**. The **Encode** interface is displayed. See Figure 4-3.

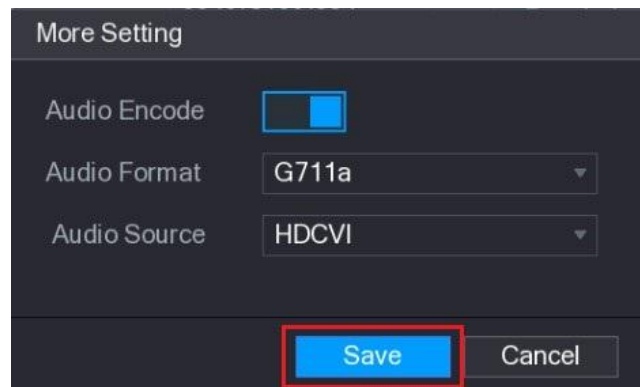

Figure 4-3 Encode setting

Step 2 In the **Channel** list, select the camera that you want to configure according to the coaxial port number.

- Step 3** In the **Main Stream** column, click **More Setting**.
The **More Setting** interface is displayed. See Figure 4-4.

Figure 4-4 More setting

- Step 4** In the **More Setting** interface, you can configure the audio settings.
- Enable **Audio Encode** function.
 - In the **Audio Format** list, leave to the default.
 - In the **Audio Source** list, select **HDCVI**.

- Step 5** Click **Save** to save the settings.

The **Encode** interface is displayed (Figure 4-3).

- Step 6** In the **Encode** interface (Figure 4-3), click **Apply**.

4.3 Operating OSD Menu

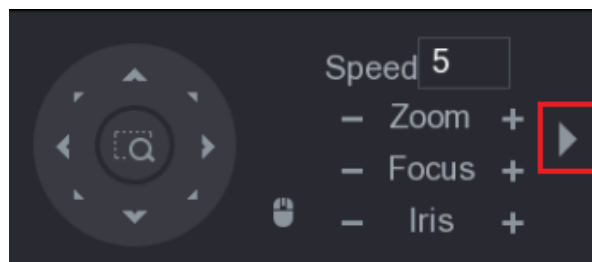

The OSD menus of different cameras might vary, and the actual product shall prevail.

- Step 1** In the shortcut menu (Figure 4-1), click **PTZ**.

The PTZ setting interface is displayed. See Figure 4-5.

Figure 4-5 PTZ setting

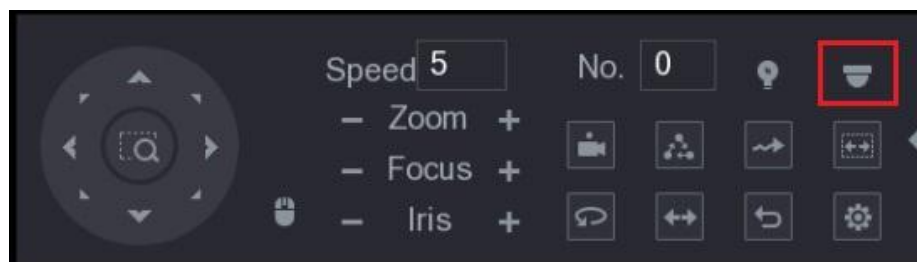

- Step 2** Click  to see more options. See Figure 4-6.

Figure 4-6 PTZ setting options

- Step 3** Click .

The **MENU OPERATION** panel is displayed. See Figure 4-7.
The OSD menu of the corresponding camera is displayed on the live view screen.

Figure 4-7 Menu operation panel

For functions of the buttons in the **MENU OPERATION** panel, see Table 4-1.

Table 4-1 Menu operation panel function

| Button | Function | Button | Function |
|---|--------------------------|---|-------------------|
|  | Enter or confirm an item |  ,  | Select item |
|  | Exit OSD menu |  ,  | Change item value |

If there is "↵" as the value of an OSD item, click **Enter** to go to the next level of this item. Click **Return** to go back to the previous level. Clicking **Cancel** is to exit OSD menu without saving the modifications.

In order to maintain the image quality and proper functioning of the device, please read the following maintenance instructions carefully and hold rigid adherence.

Disassembly and Desiccant Replacement

- Carefully follow the instructions in the manual when performing any disassembly operation about the device; otherwise, it might cause water leakage or poor image quality due to unprofessional disassemble.
- Please contact after-sale service for desiccant replacement if there is condensed fog found on the lens after unpacking or when the desiccant turns green. (Not all models are included with the desiccant).

Maintaining Lens and Mirror Surface

- The lens and mirror surface are covered with antireflection coating, which could be contaminated or damaged and result in lens scratches or haze image when being touched with dust, grease, fingerprints and other similar substances.
- Do not touch the image sensor directly (CCD or CMOS). Dust and dirt could be removed with air blower, or you can wipe the lens gently with soft cloth that moistened with alcohol.

Maintaining Device Body

- Device body can be cleaned with soft dry cloth, which can also be used to remove stubborn stains when moistened with mild detergent.
- To avoid possible damage on device body coating which could cause performance decrease, do not use volatile solvent such as alcohol, benzene, diluent and so on to clean the device body, nor can strong, abrasive detergent be used.
