# MP-1/R

AUDIO MODULE (ADJUSTABLE)

The MP-1/R module is designed for cooperate with DVRs. It was made in SMD technology. The device has 10cm long cable with microphone and gain control PCB potentiometer.
The device has a screw terminal (ARK) to connect to the DVR (three wires). The signal ground and the power ground are common (GND).

SPECIFICATIONS:
Power – 12V DC
Current consumption – 5mA
Gain control – 1x-500x
Length of the microphone cable – 10cm
Weight – 7g
Dimensions – 20 x 25 x 15mm

Schematic diagram (PCB front view):
